**ADOPTED REGULATION OF THE  
STATE ENVIRONMENTAL COMMISSION  
LCB File No. R099-02 (SEC Petition 2002-10)**

Effective December 17, 2002

EXPLANATION – Matter in *italics* is new; matter in brackets ~~[omitted material]~~ is material to be omitted.

AUTHORITY:        §§1-63, NRS 445A.425 and 445A.520.

**Section 1.** Chapter 445A of NAC is hereby amended by adding thereto the provisions set forth as sections 2 and 3 of this regulation.

**Sec. 2.**    *“E. Coli” means escherichia coli.*

**Sec. 3.**    *1. The acute criteria of water quality with regard to the concentration of total ammonia are subject to the following:*

*(a) The 1-hour average concentration of total ammonia, in milligrams of nitrogen per liter, for the protection of freshwater aquatic life is shown in Table 1.*

*(b) For cold water fisheries, the concentration of total ammonia, in milligrams of nitrogen per liter, must not exceed the applicable acute criterion listed under “Cold Water Fisheries” set forth in Table 1, more than once every 3 years on average.*

*(c) For warm water fisheries, the concentration of total ammonia, in milligrams of nitrogen per liter, must not exceed the applicable acute criterion listed under “Warm Water Fisheries” set forth in Table 1, more than once every 3 years on average.*

*2. The chronic criteria of water quality with regard to the concentration of total ammonia are subject to the following:*

*(a) The 30-day average concentration of total ammonia, in milligrams of nitrogen per liter, for the protection of freshwater aquatic life is shown in Tables 2 and 3.*

*(b) The concentration of total ammonia, in milligrams of nitrogen per liter, expressed as a 30-day average must not exceed the applicable chronic criterion listed in Tables 2 and 3 more than once every 3 years on average, and the highest 4-day average within the 30-day period must not exceed 2.5 times the applicable chronic criterion.*

*(c) Table 3 must not be used unless the division receives acceptable documentation of the absence of freshwater fish in early life stages.*

## TEXT OF REPEALED SECTION

**Sec. 4.** NAC 445A.119 is hereby amended to read as follows:

**NAC 445A.119 Criteria for water quality for designated beneficial uses.** The water quality criteria for designated beneficial uses for the various waters of the state are in the following table. The criteria are water quality characteristics based upon available scientific and technical information and are to be used as guidelines in establishing water quality standards.
